Emotion and Global Consciousness

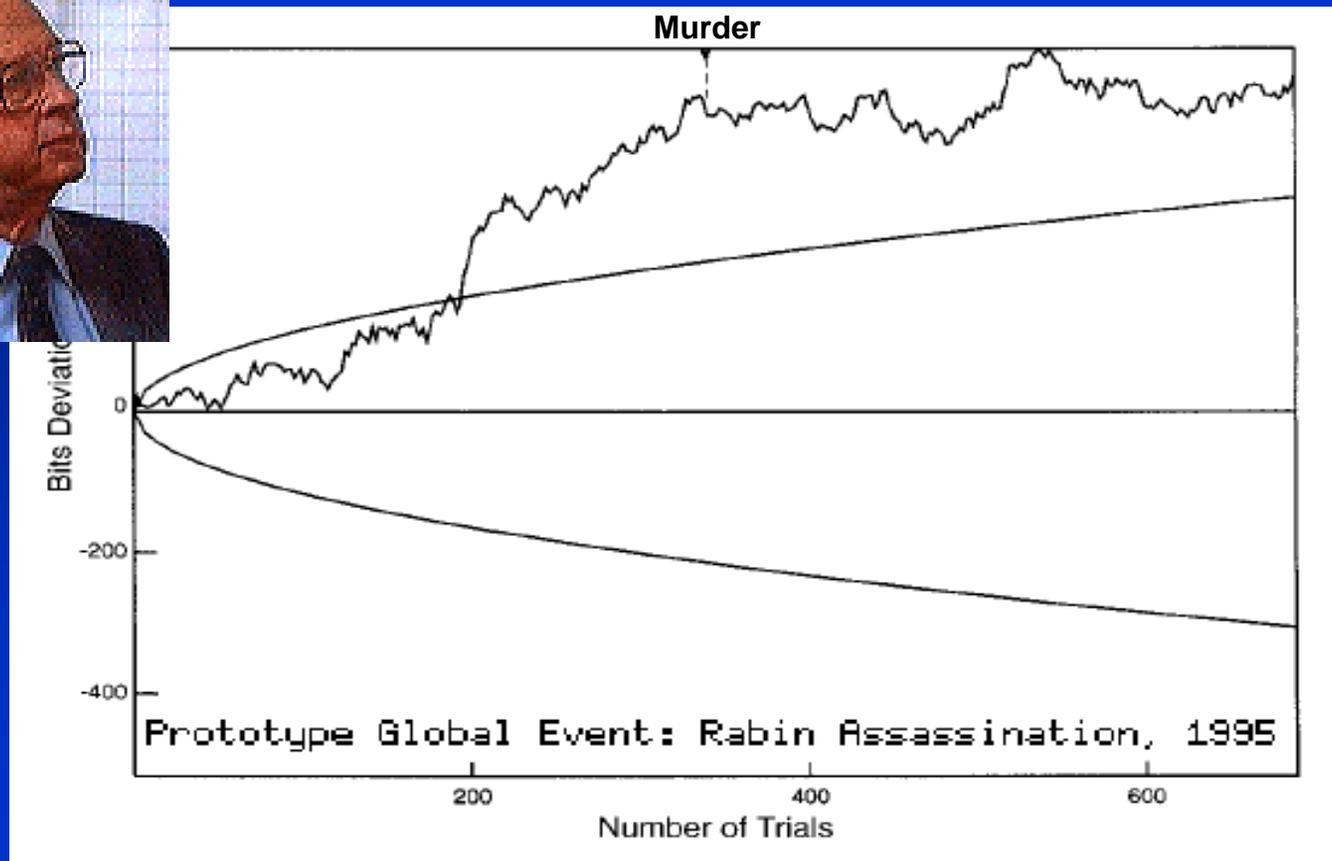

**A study of basic emotions evoked or embodied
In major events correlated with GCP/EGG data**

**Prepared for a presentation to the
Bial Symposium on Emotions**

Roger Nelson

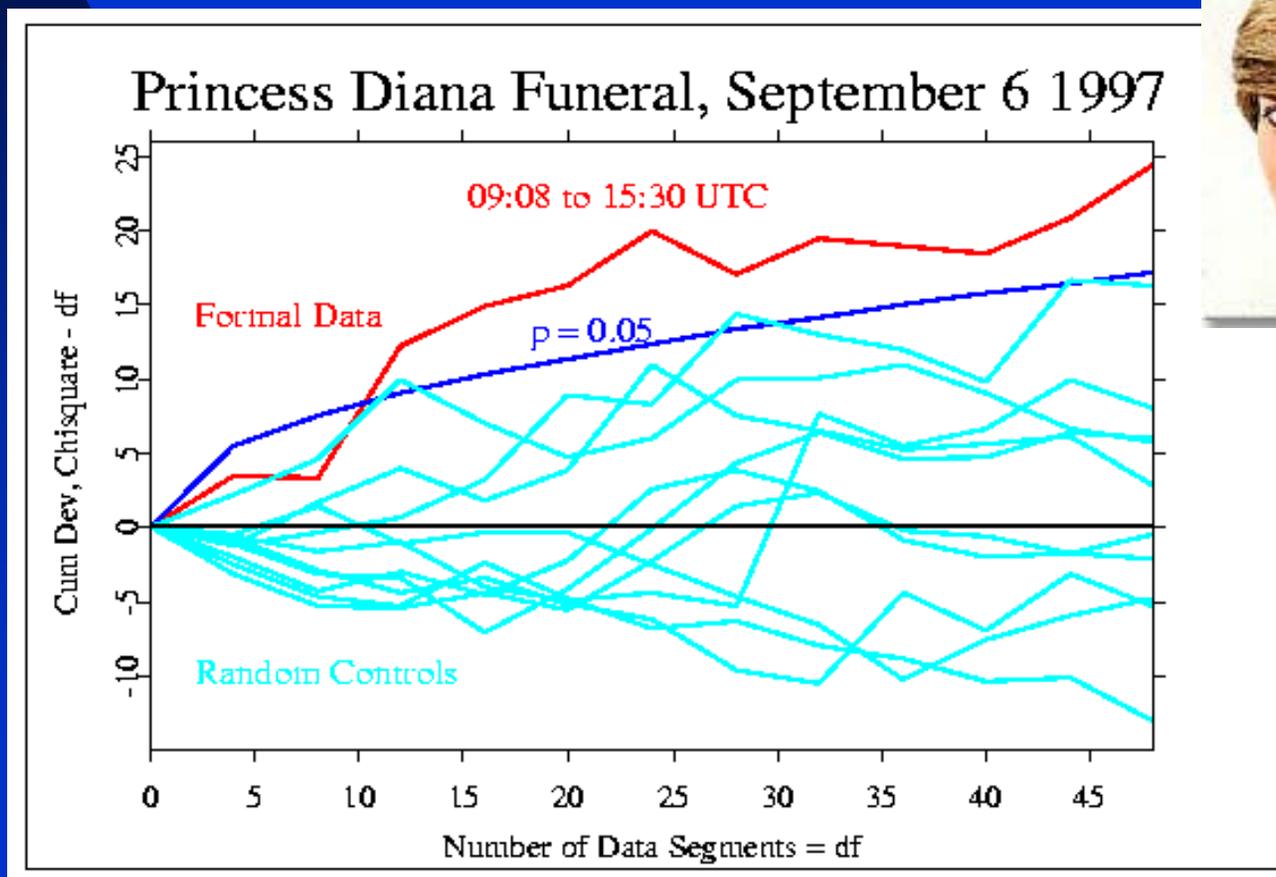

**Global Consciousness Project
<http://noosphere.princeton.edu>**

A prototype global event, November 1995 Assassination of Yitzhak Rabin Surprise, Fear, Sadness

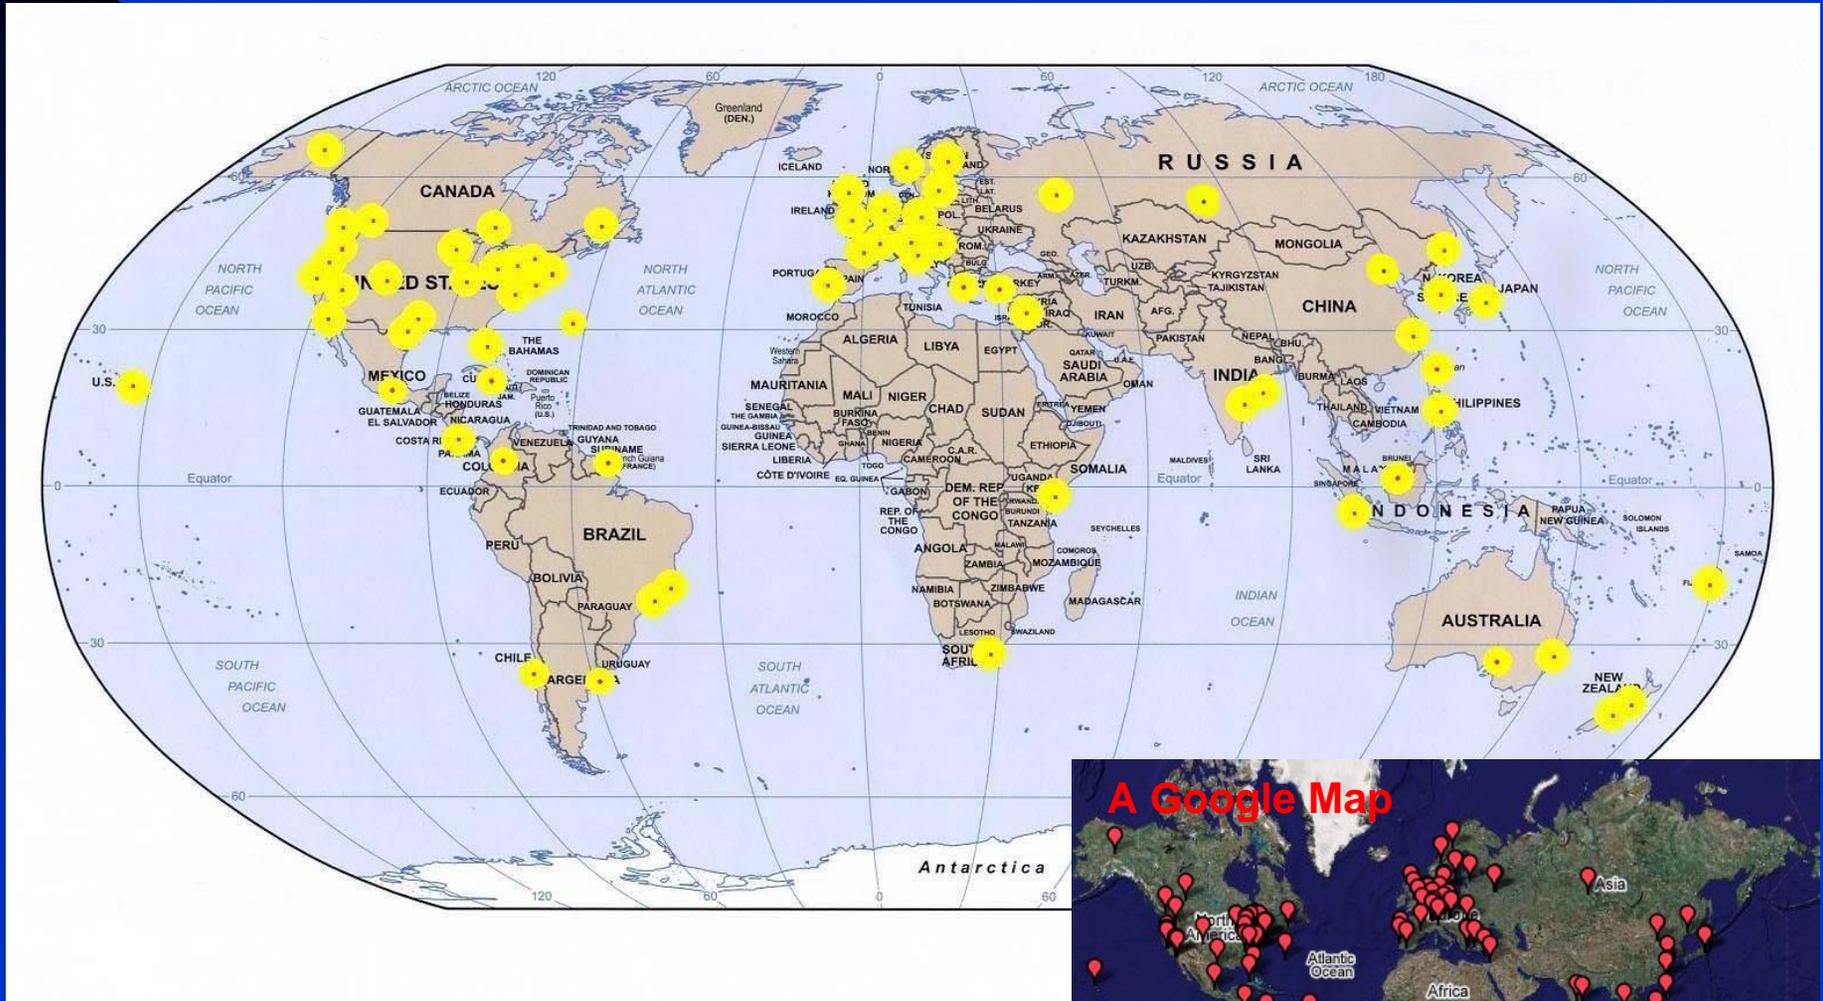

Princess Diana's Funeral Sadness, Compassion, Love Multi-REG data, 12 independent data streams

Expectation is level trend

A World Spanning Network of About 60 Eggs

<http://noosphere.princeton.edu/egghosts/>

The World Trade Center

September 11
2001

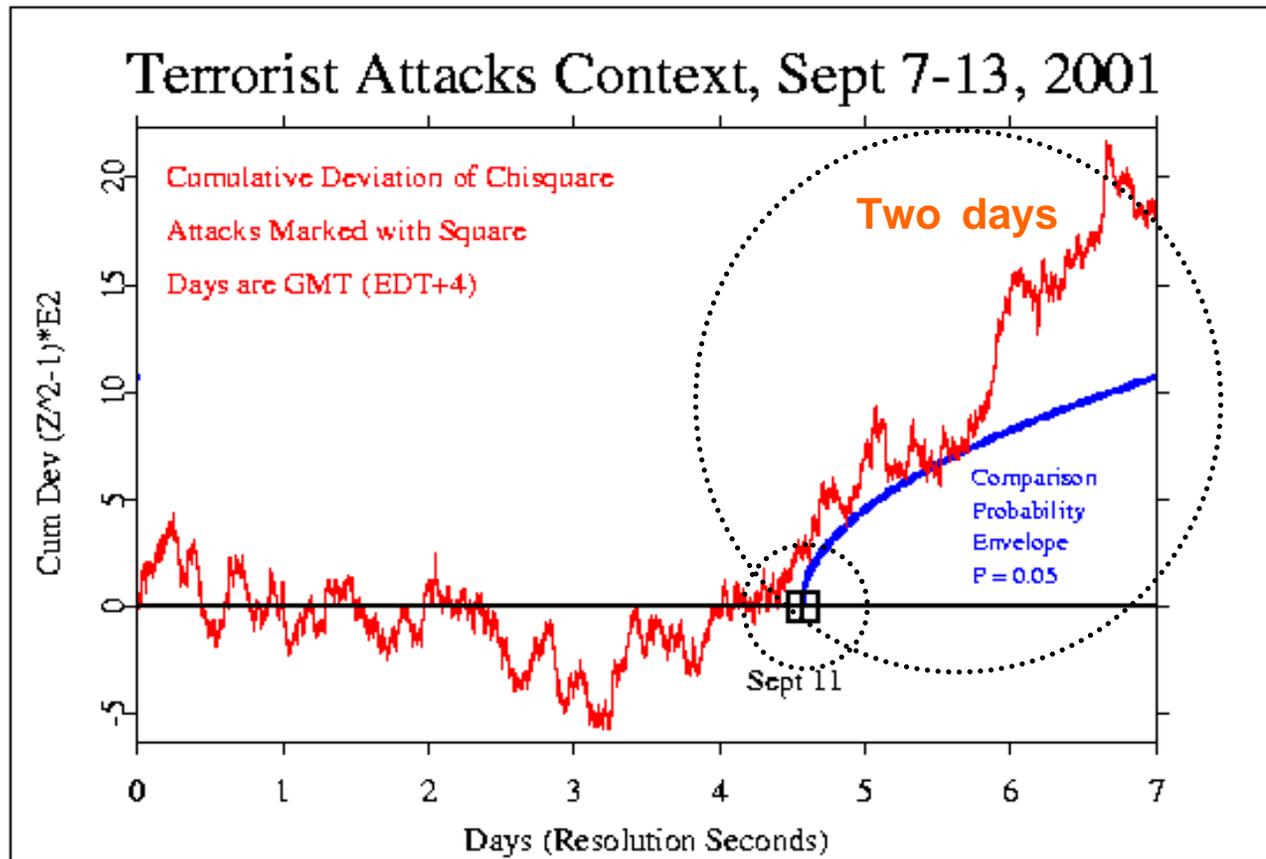

The GCP network
Then had 37 REGs
Around the world

September 11 2001

Destruction of the World Trade Towers

A 50-hour trend followed the attacks

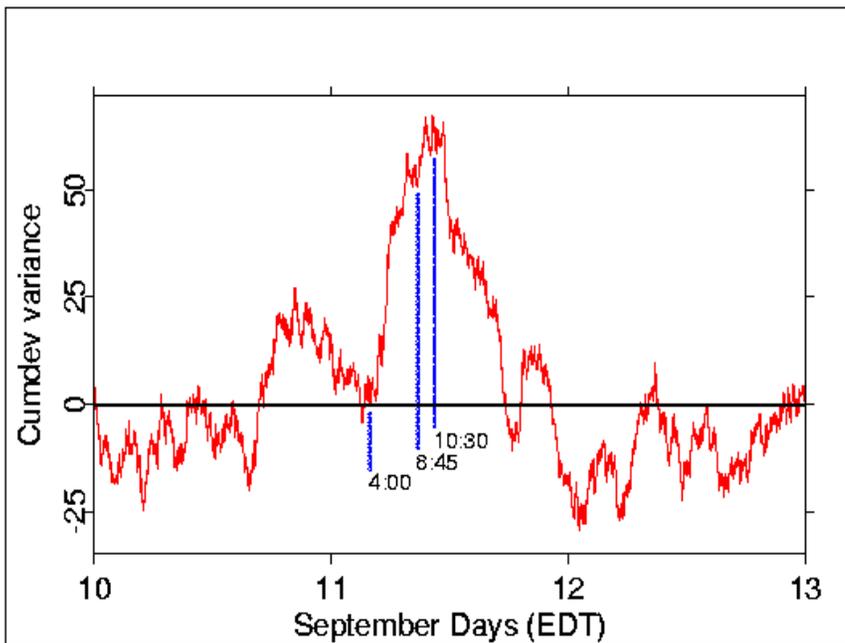

Other Views of September 11 2001

These are pictures of the variability among the eggs
They should look like a “random walk” on 9/11, but ...

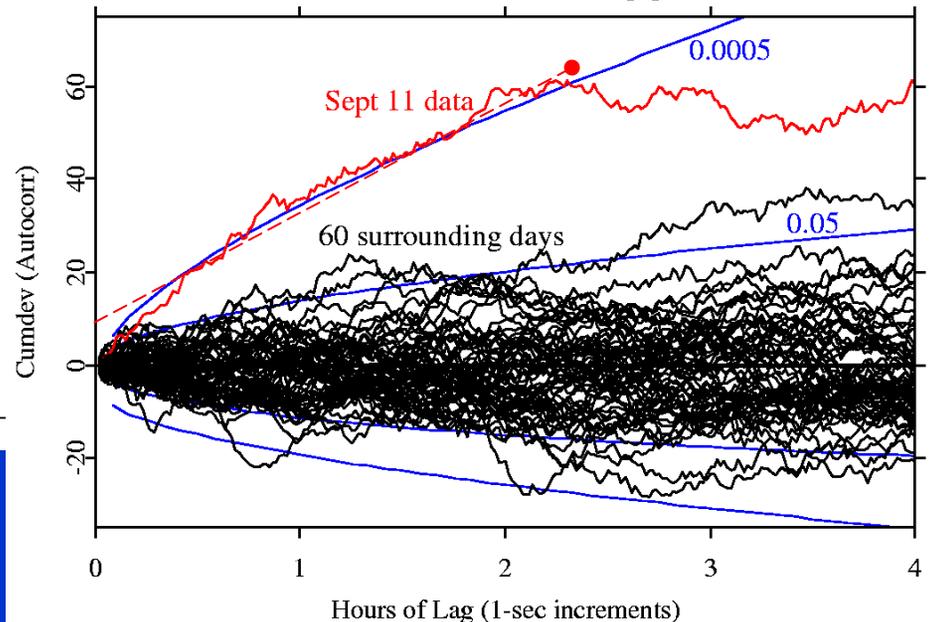

Variance began changing at 04:00

9/11 was unique
in 3 years of data

*The autocorrelation says
this event was extraordinary*

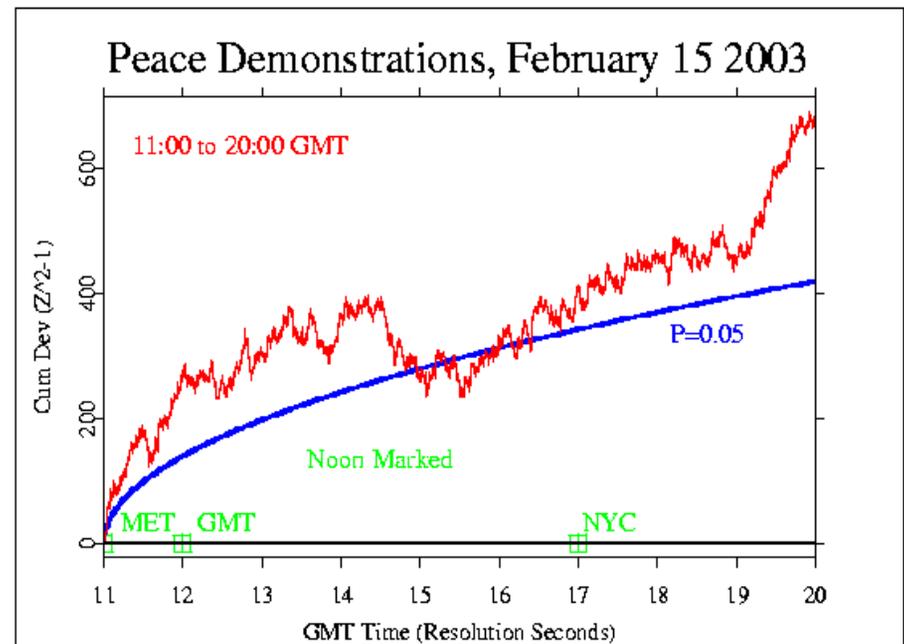

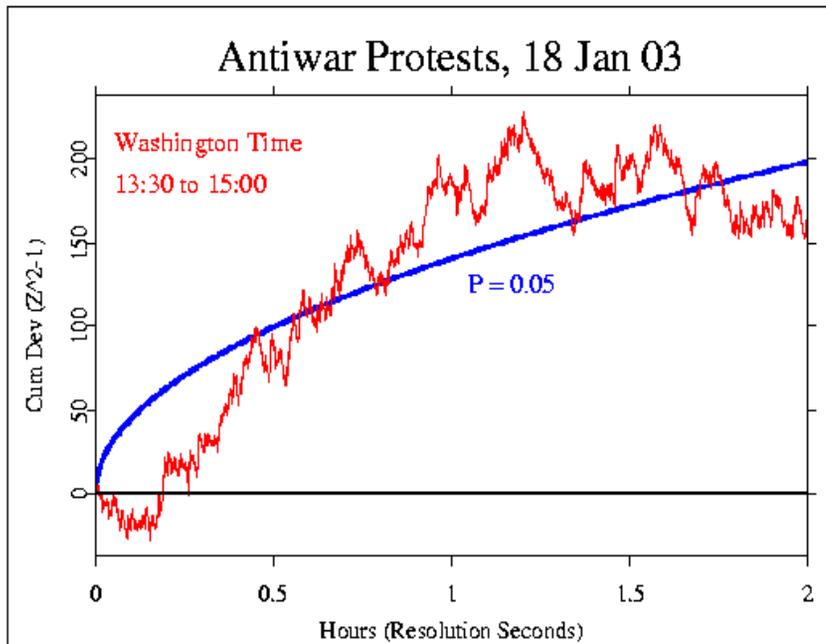

Autocorrelation, Inter-Egg Variance

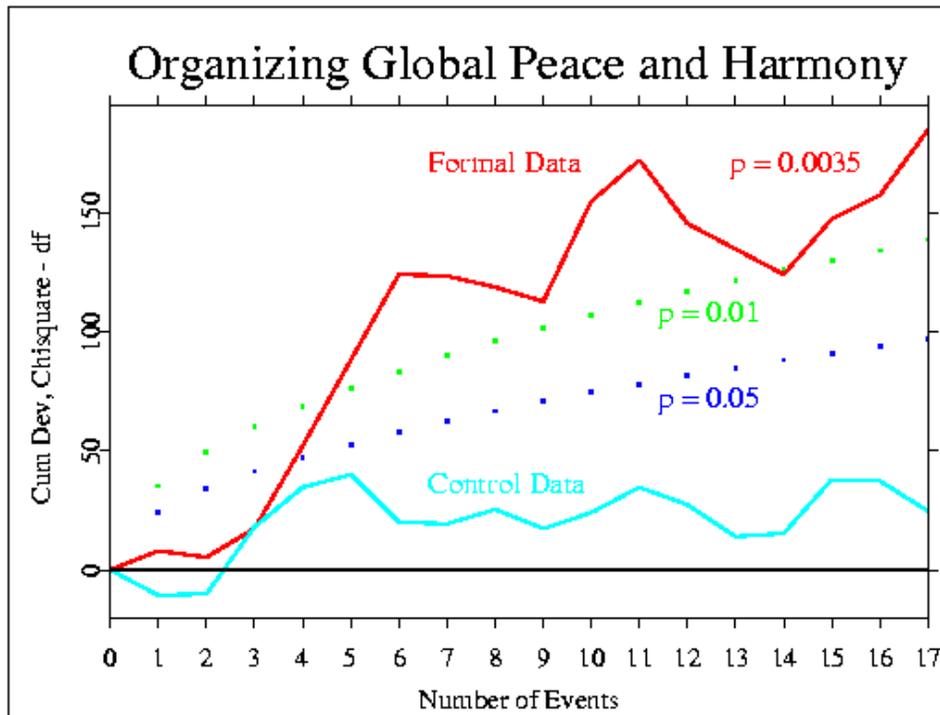

Consciousness Fields?

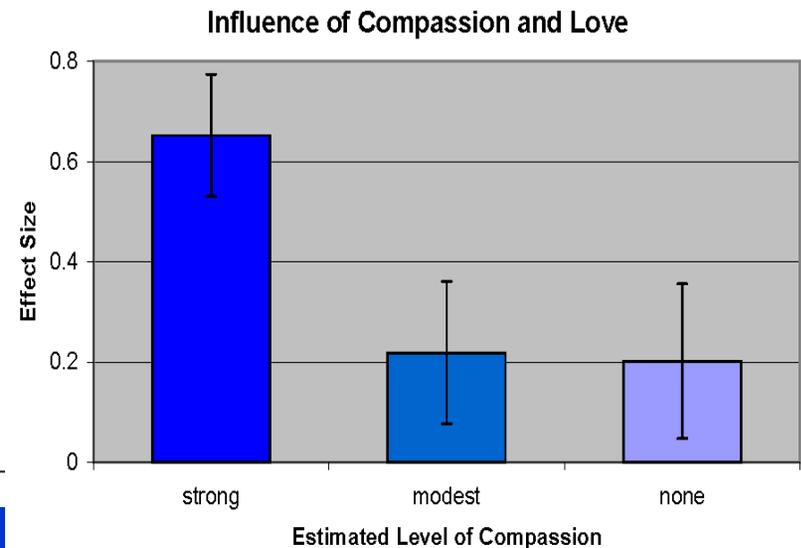

Compassion may
be a primary
source

Positive intent and compassion An organizing field of consciousness?

*2004 analysis based on
Jaan Suurkula hypothesis*

**Compassion seems inherent
in efforts to build or restore
the social fabric**

Meditations, Prayer Vigils, Ceremonies

**Compassion implies Interaction,
Interdependence, Respect, Love**

**It is a necessary and possibly sufficient
Substrate for shared consciousness**

Querying the GCP Results

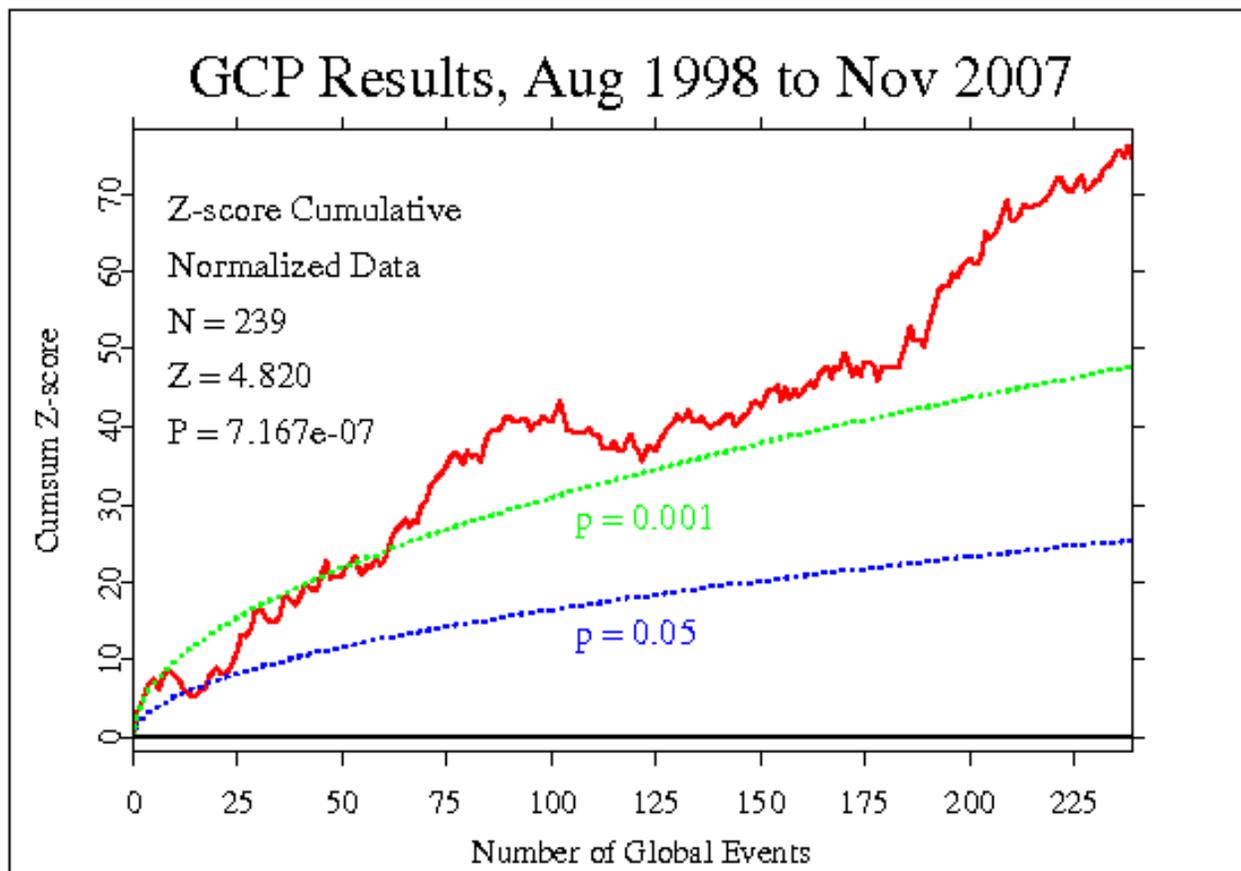

First, we look at overall findings

Second, general categorizations

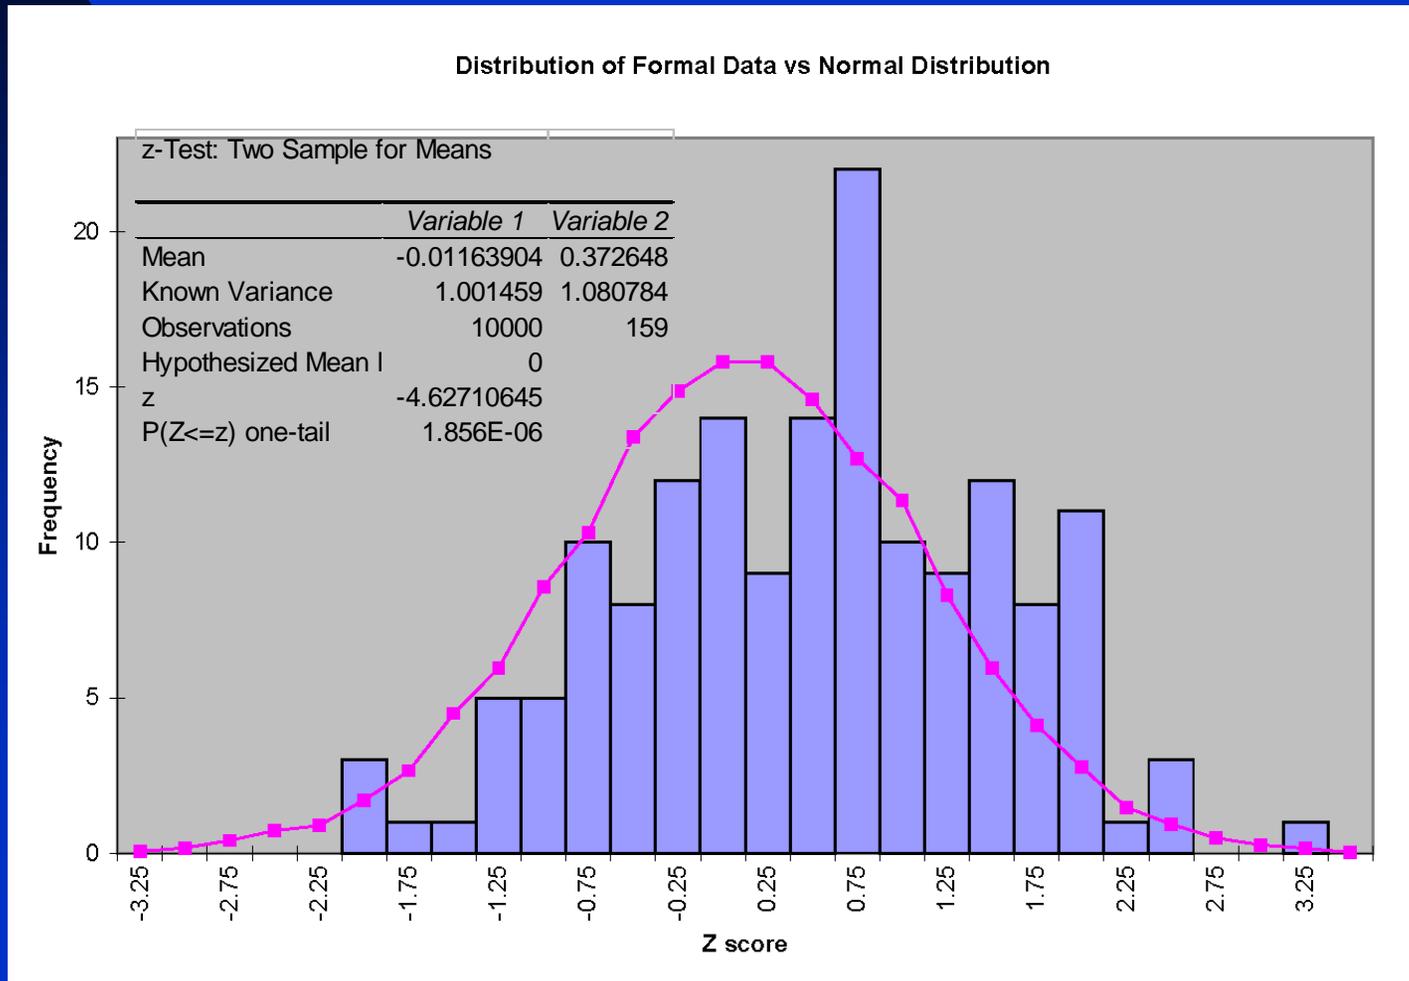

Specific questions about emotions

Overarching implications and conclusions

Current result: formal database, 9 years
239 rigorously defined global events
Odds: Million to 1 against chance

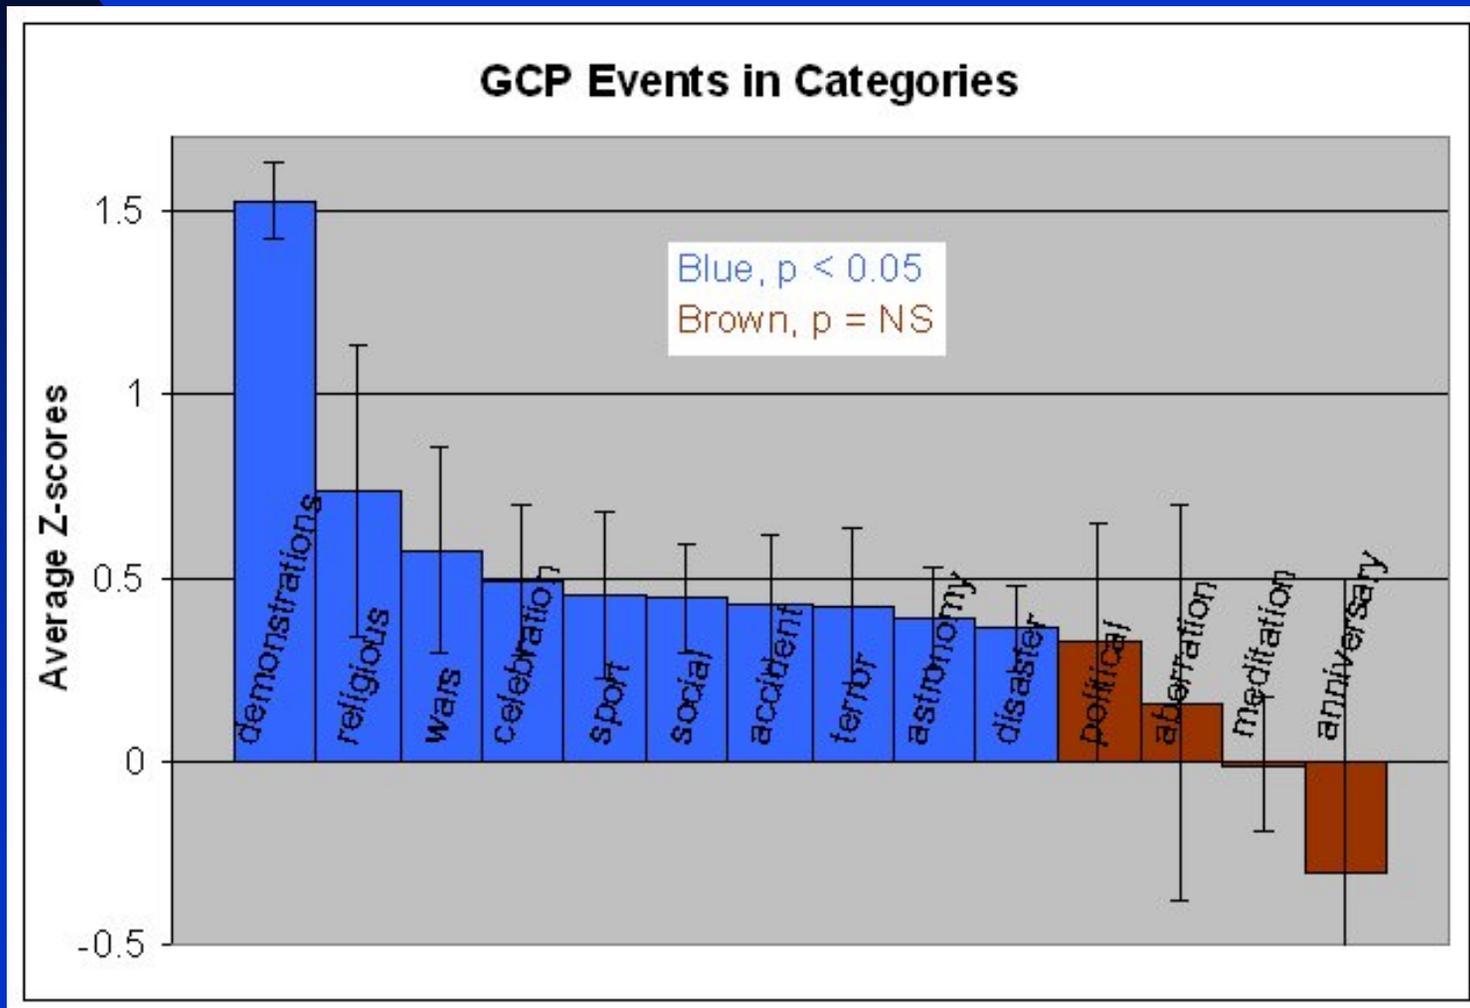

Distribution of Event Z-scores: Roughly normal, shifted by 0.37 std dev (Small effect implies potential small sample issues)

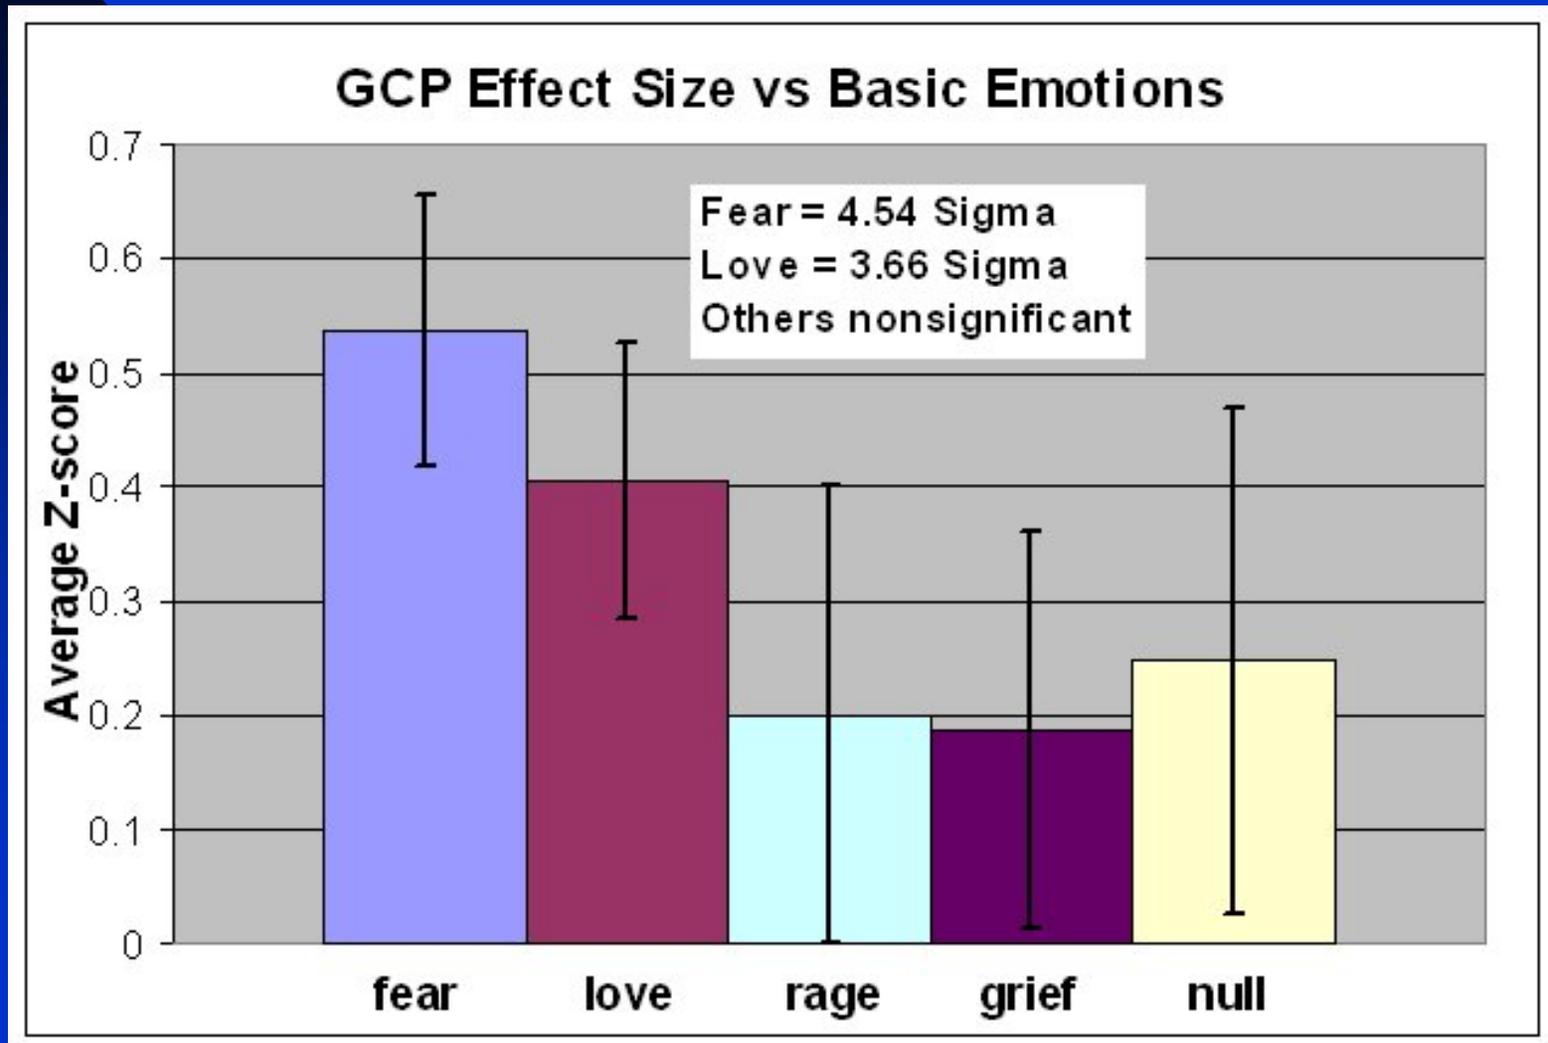

Effects by GCP event categories

2007 update generally similar to 2004

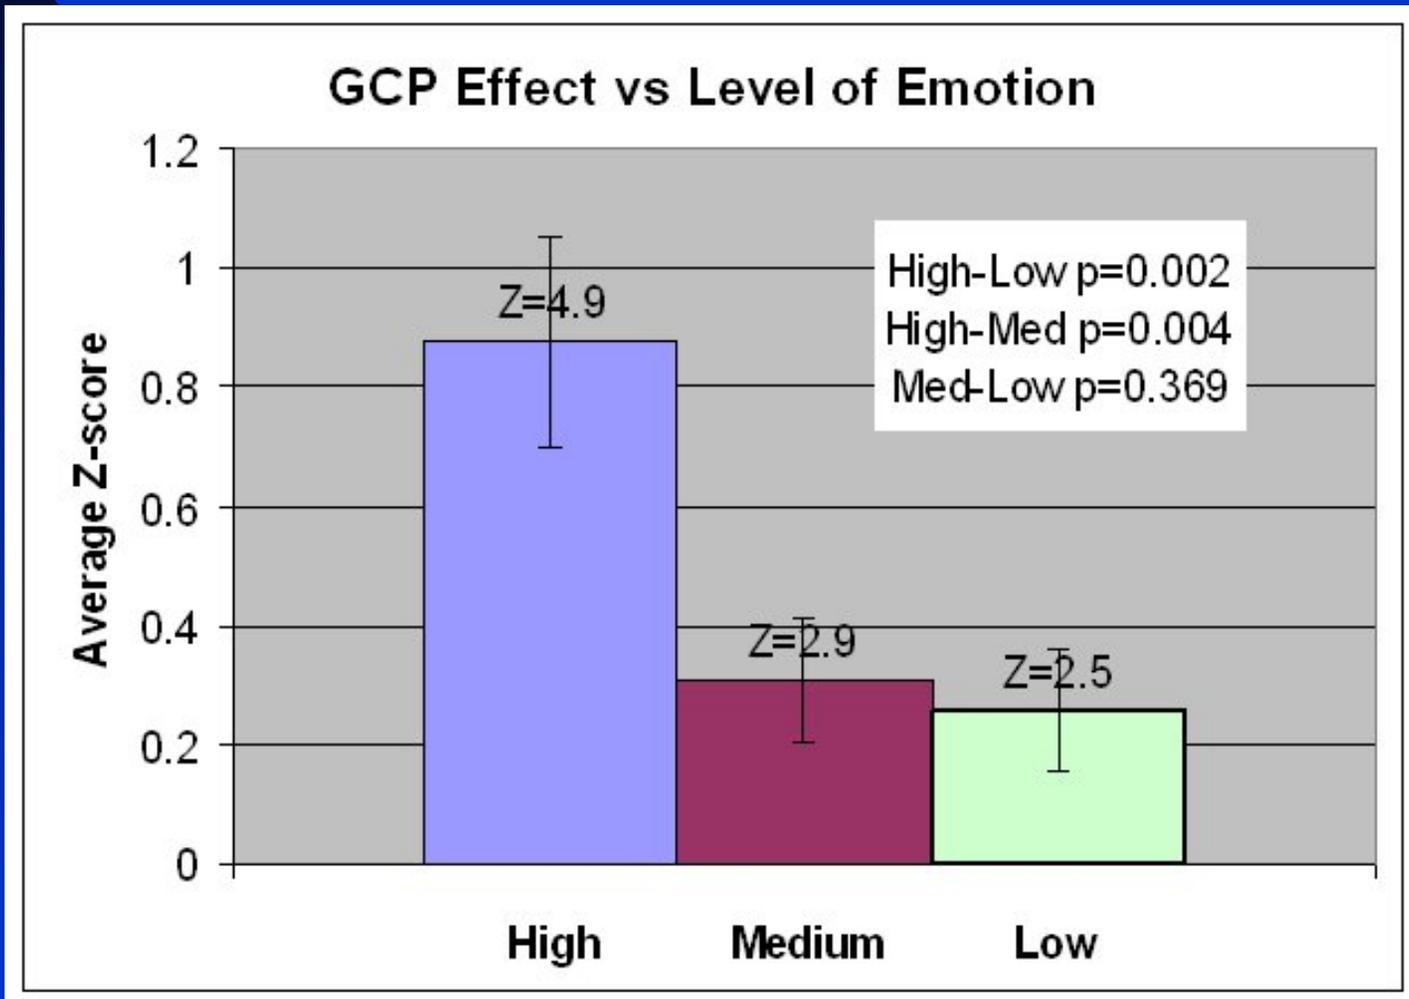

(More categories are significant – N is greater)

William James' Four Basic Emotions Derived from "Bodily Involvement"

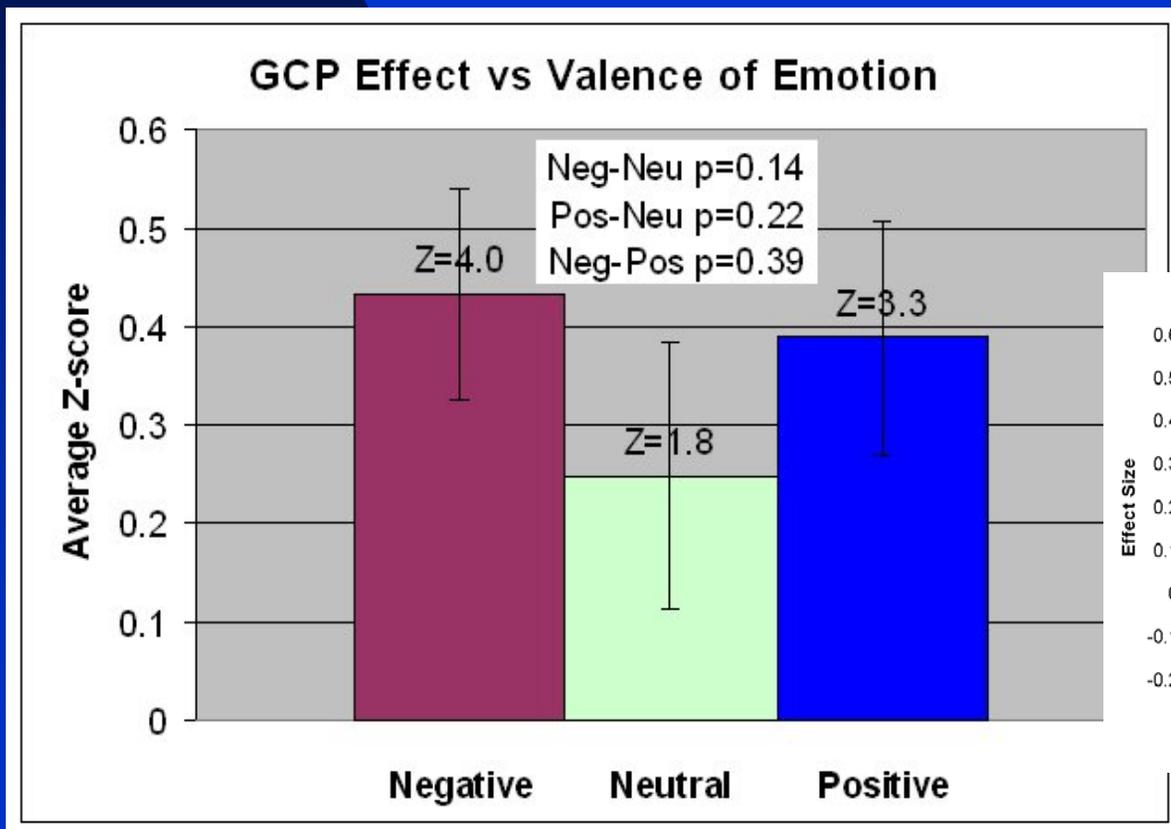

Level of emotion relatively easy To assign -- highly significant factor

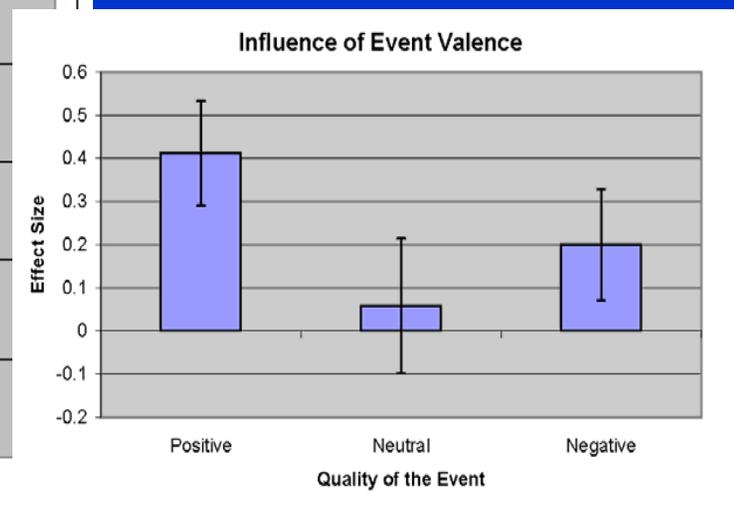

VALENCE: Both positive and negative events Have larger effects than neutral events (But differences are not significant)

2007

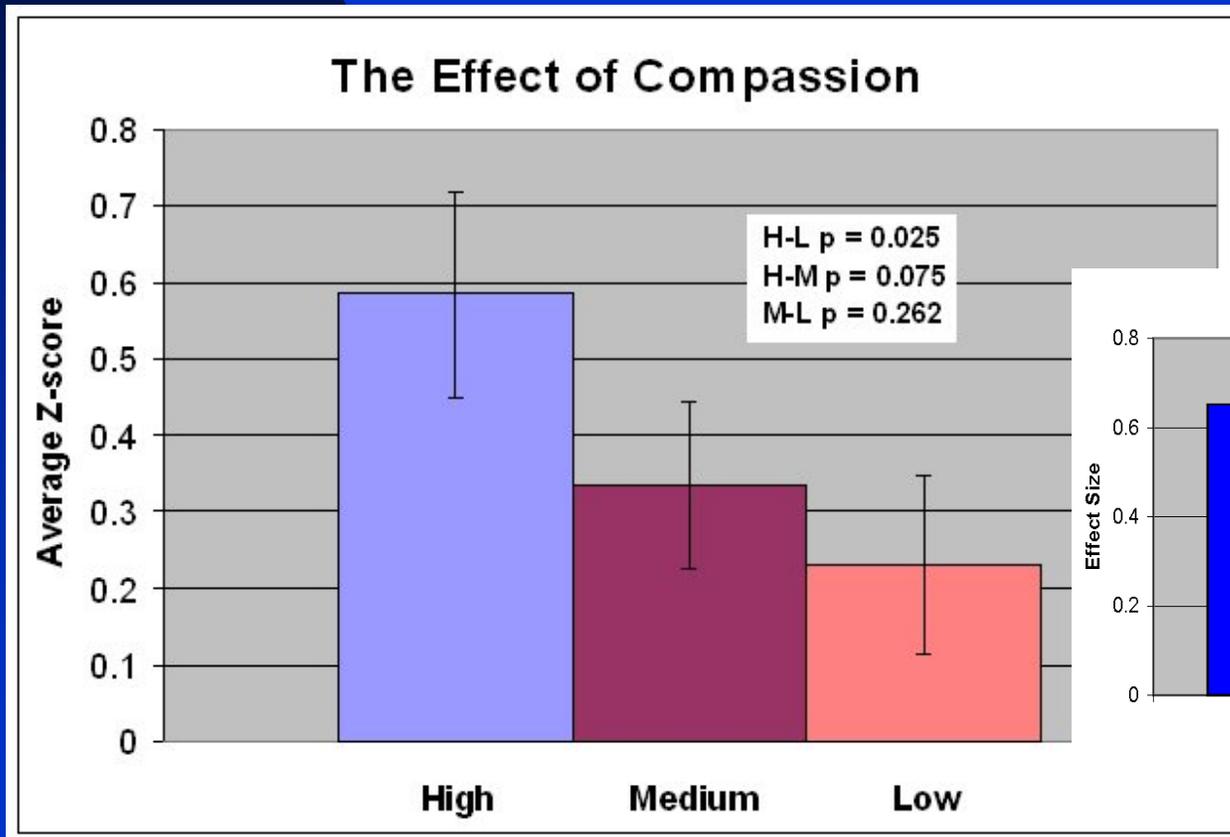

2004

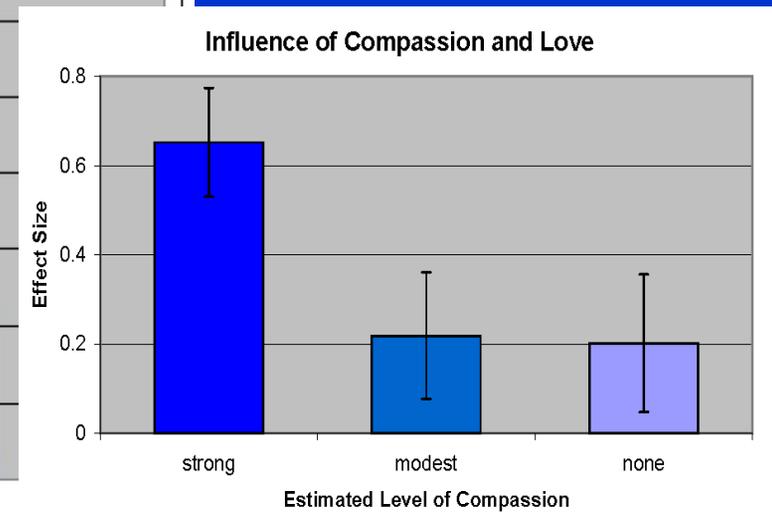

COMPASSION: Events that evoke or Comprise compassion or love Have larger effects

2007

2004

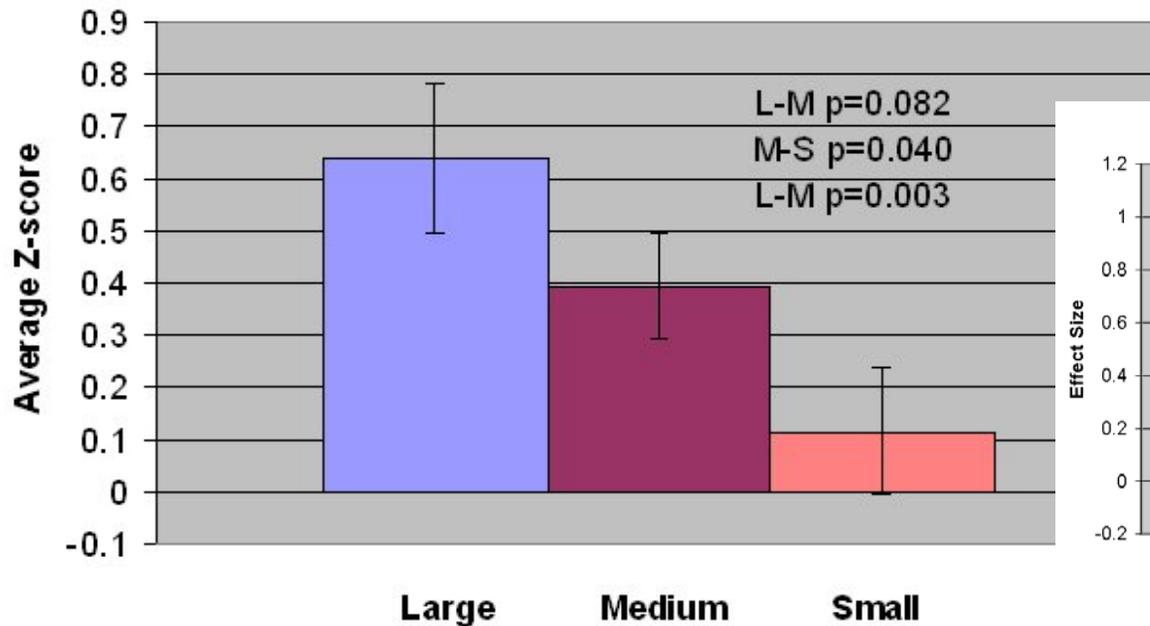

(Hypothesis proposed by Jaan Suurkula)

NUMBER of people paying attention has a substantial effect on the network Significant but may be confounded

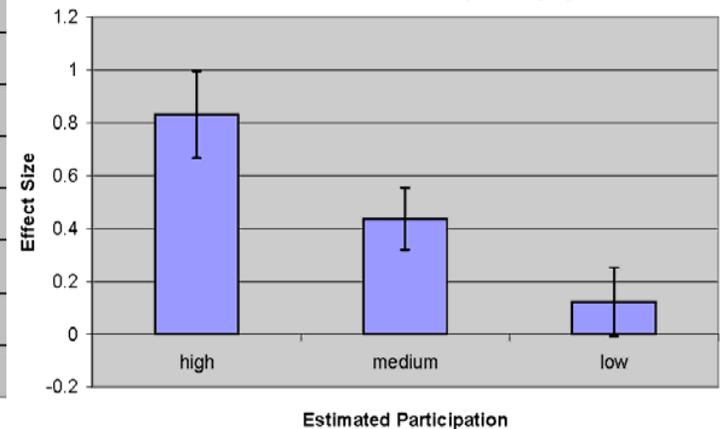

2007

Estimated Number Engaged

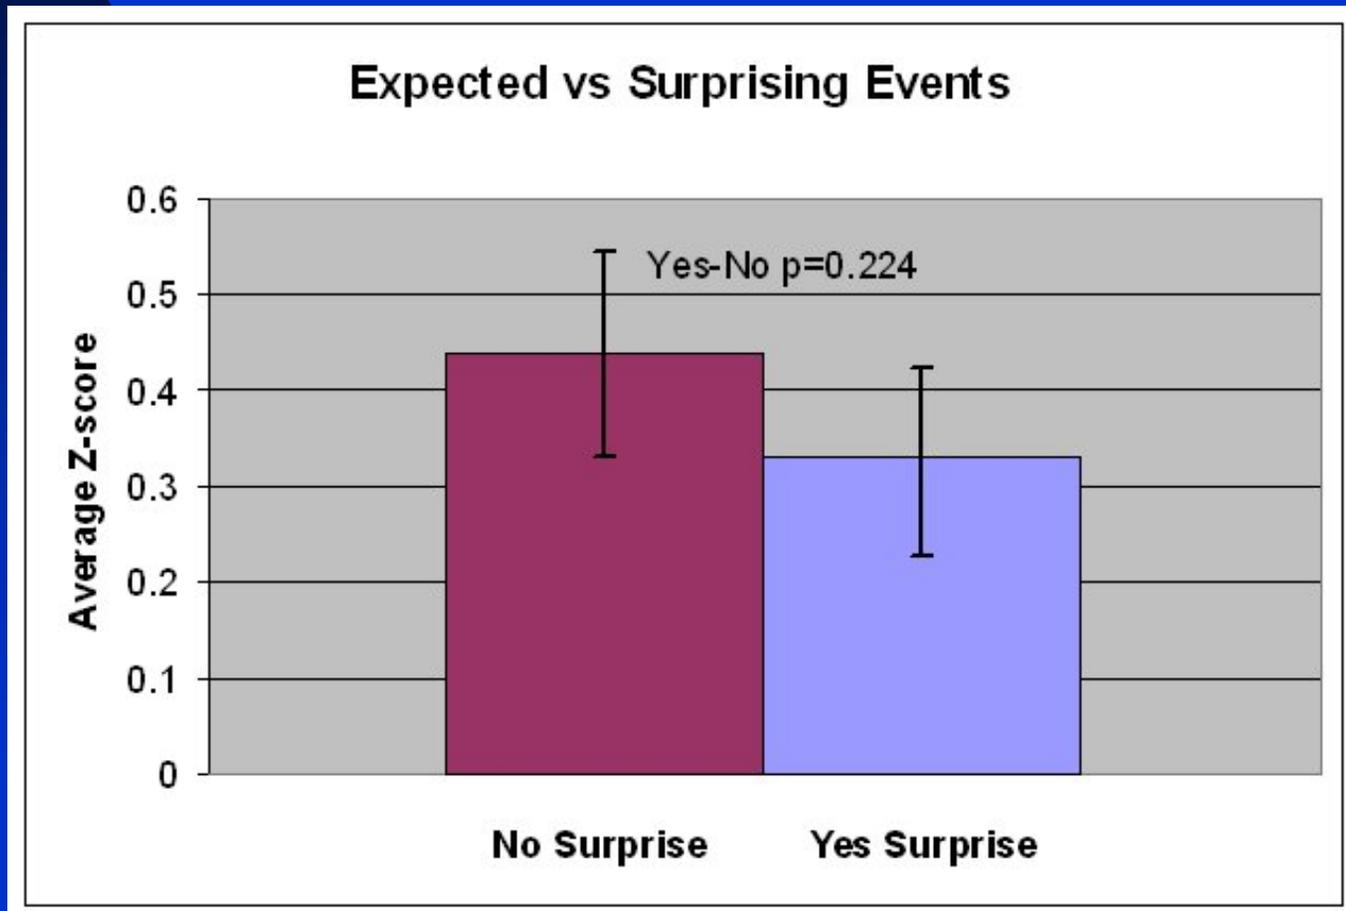

2004

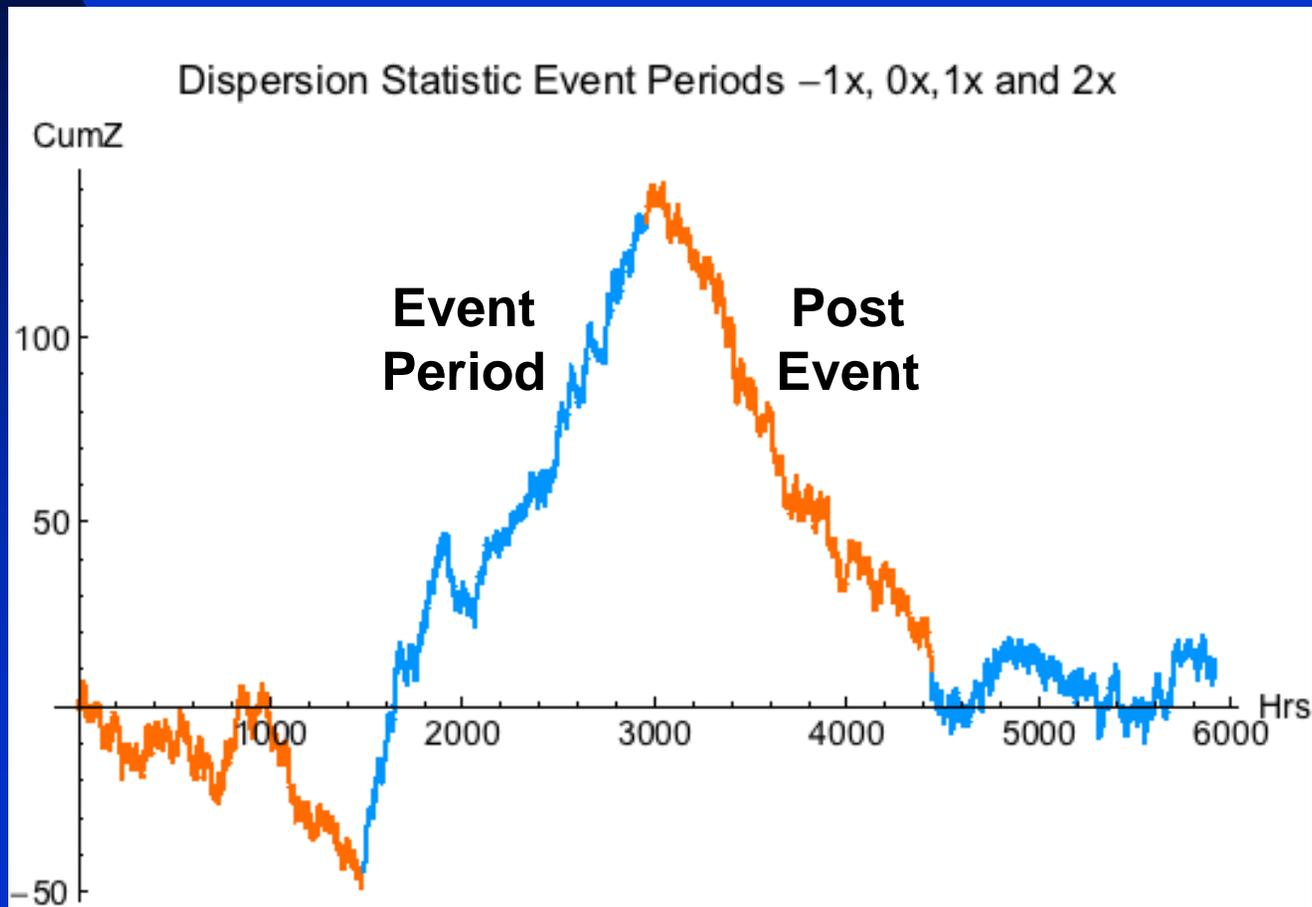

Effect of Number of People Engaged

Surprise is listed by some researchers As an emotion, but it does not have A big effect in GCP formal events (note possible confounds with some emotions)

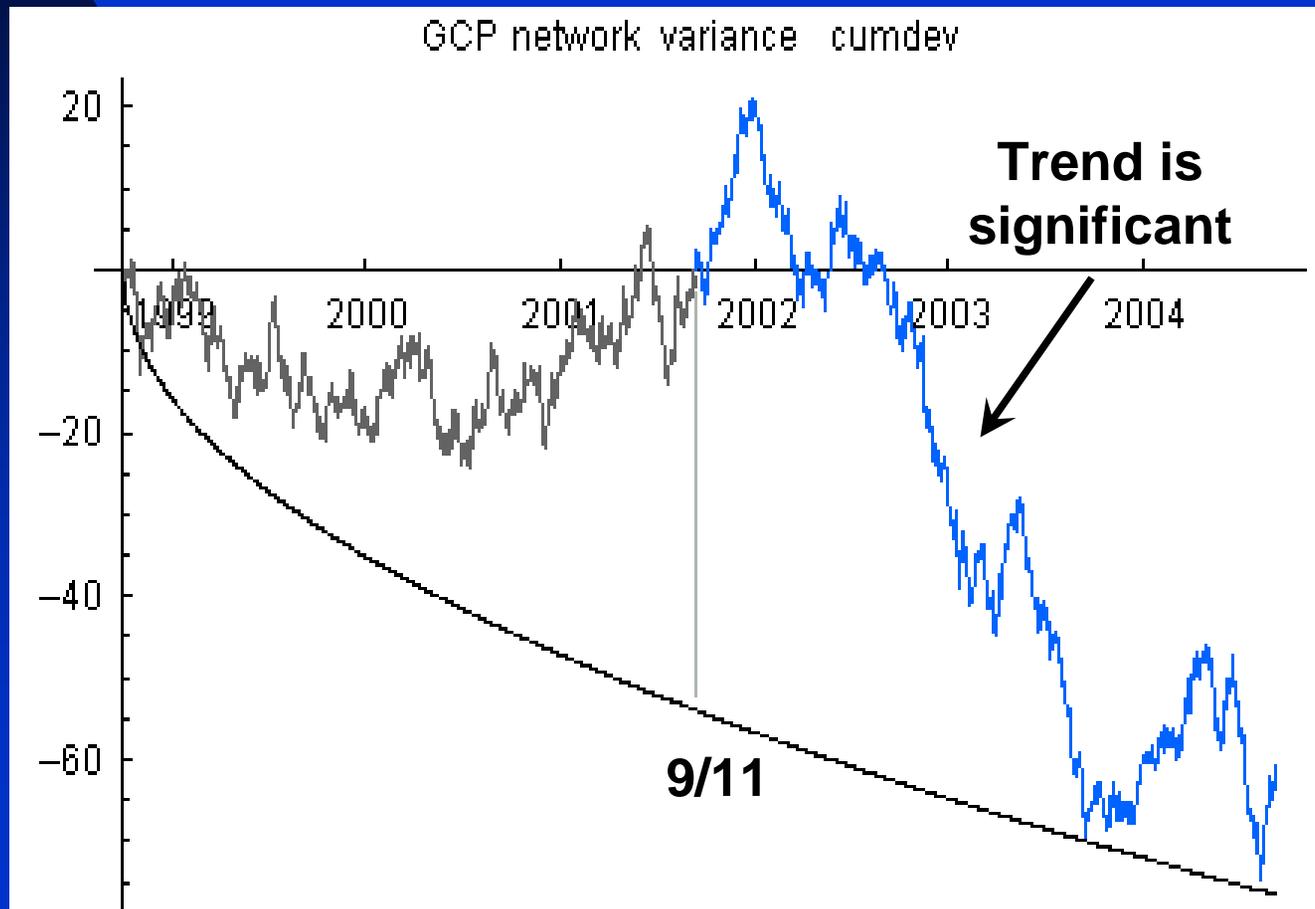

A reversal of trend After the defined event: *Probably Changing Emotions*

*Analysis by
Peter Bancel*

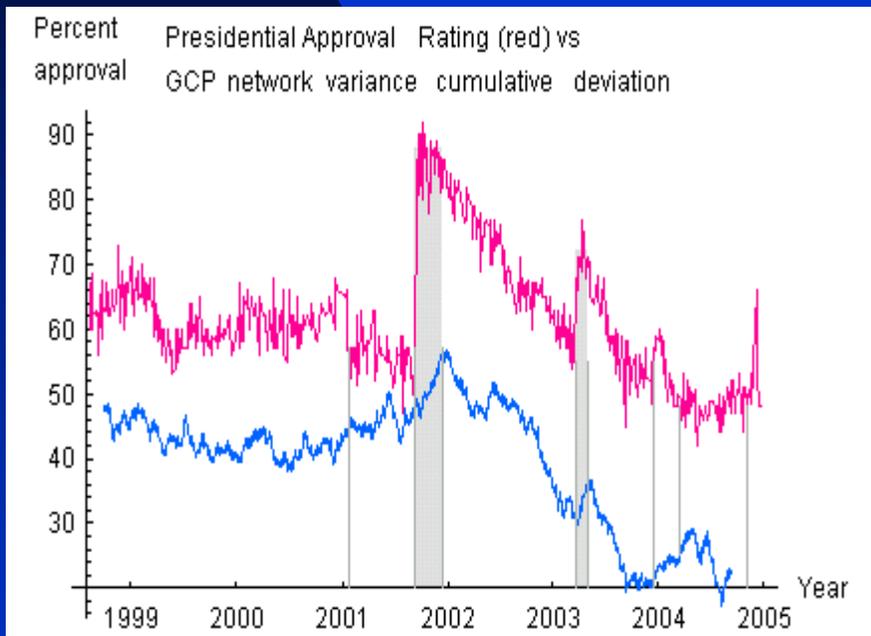

Emotion on a grand, global scale?

Long-term negative trend in primary measure
Are we meditative, or depressed?

*Analysis by
Peter Bancel*

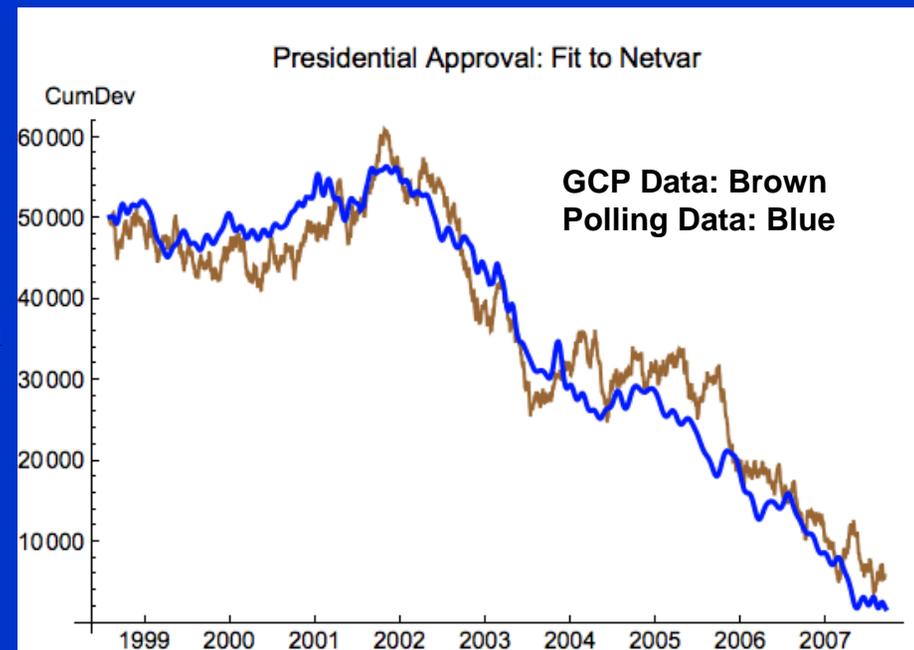

What might explain the long-term trend? Correlation with a sociological measure *Presidential Approval Rating vs NetVar*

We see similar spikes and trends

Analysis by Peter Bancel

Model Fit & Update to 2007

How could these trend Correlations come about?

Maybe the EGGs reflect our long-term
Emotional state. We're conscious it
Is not a happy time in the world.

We have much to do.

"The Age of Nations is past. The task before us now, if we would not perish, is to build the Earth."

- - Père Teilhard de Chardin

Can the flap of a butterfly's wings ...

GCP/EGG Project

The people who make it go

International collaboration of about 100 Scientists, Artists, Friends, ...

Richard Adams, USA, general support

Brad Anderson, USA, widget programming

Peter Bancel, Paris, professional analysis, collaboration

Paul Bethke, USA, windows programming, network

Dick Bierman, Netherlands, design and realtime display

Taylor Jackson, Canada, realtime display maintenance

Greg Nelson, USA, program architecture, general support

Dean Radin, USA, design and independent analysis

Fernando Rodríguez, Spain, egghosts google map

Leane Roffey, USA, music, outreach, general support

Jaroen Ruuward, Netherlands, realtime programming

Dick Shoup, USA, independent analysis

Nishith Singh, India, realtime programming

Mahadeva Srinivasan, India, general support

William Treurniet, Canada, egganalysis programming

John Walker, Switzerland, programming, general support

... And all the **EGG hosts** around the world
